MEMORANDUM FOR: Deputy Director for Science & Technology

Carl:

25X1A Attached is a letter recently sent to the Director from [] which addresses the question of the Agency's Program Memoranda and special studies. While not all aspects of the letter are of immediate concern to your Directorate, I believe that as you give your personal examination to its contents, you will see the importance of our working together through the PPB system to present the best possible case for the Agency's programs. The necessary work required by the attachments is in train, but the problems are of considerable magnitude.

I would appreciate your giving this your personal attention to assure that the best case is being developed by your subordinates in all aspects of program review.
